- And much more...

The Steadicam Pilot™ & Co-Pilot™

The new Steadicam Pilot and Co-Pilot are state of the art, lightweight, affordable stabilizer systems designed especially for the modern breed of lightweight cameras from 2 to 10 pounds. Video professionals need add only battery and camera of choice as all other required system components are provided for normal operation.

The Steadicam Pilot is designed with a lightweight Iso-elastic Arm and ultra low profile vest, lightweight sled with Carbon-Lite expandable post, upgradeable color 3.5" LCD Monitor, low mass gimbal and offers advanced features/benefits with low cost for the Video Professional.

*Arm Compacts
Down For
Travel Storage*

The Iso-Elastic™ Arm is a two-section, articulated, No-Tools design that can be adjusted while supporting the camera. With this patented, unique design, the Steadicam operator can smoothly and effortlessly raise or lower the arm throughout its 28 inch boom range. The iso-elastic arm is also non-reactive – improving vertical stability and control in all operating conditions, from lock-offs to fast running shots over rough terrain.

The Pilot's Ultra Lightweight, Low Profile Vest is designed to provide complete comfort and functionality for extended productions and long continuous shots. No-tools adjustments make it easy to adjust on the "fly".

*Secure Locking of
Stage Plate via
4x Captive Screws.*

*CarbonLite
Expandable Post*

*Stage Plate has X-Y
Vernier Adjustment.*

The 3.5" LCD Monitor is standard and provides good contrast from dark to light situations. The monitor weight and location on the sled assures the operator perfect balance and ease of operation. Utilizing a proven Low Mass Gimbal, the operator has the ability to capture the fluid movement that only Steadicam can provide. No-tools precision camera stage establishes a solid base for the camera and facilitates smooth adjustment ease from side to side plus fore and aft. The monitor is upgradeable to a 5.8" - 16:9 version.

The Pilot is available with 12 volt battery pack options: "AA" battery pack, V-lock or Anton Bauer.

The Optional SteadiStand™ or Turtle Base "C" Stand is required for Steadicam balance and operation.

*Positionable
Monitor, Gimbal
and Battery Mounts.*

Counter Weights for Balance

The Carbonlite expandable post and interface to the stage form a solid bond to assure no jitter in the picture as the operator captures those unique scenes. The stage plate is indexed so that the camera can be re-moved and re-mounted without the need to re-adjust the balance.

The sled boasts a true three axis gimbal and is equipped with counter weights for balance and positionable monitor, gimbal and battery mounts. Counterweights are provided for balance

The Pilot sled compacts down by removing the lower cross tube.

PILOT

- PILOT-AB Sled, vest, arm, case, AB battery mount, 5.8" LCD
- PILOT-VL Sled, vest, arm, case, V-Loc battery mount, 5.8" LCD
